Projects

Sunnyside Agency

Landing Page   08/2021 – Current

- Tech and languages used are as follows: HTML5, CSS3, Javascript, Github, Gitpod, VSCode, Google Fonts and FontAwesome.
- You can view this deployed Landing page on Netlify @ https://silly-hamilton-9b3fe3.netlify.app/
- This project spans over 600 lines of code and has been and will be continually updated as I learn new skills.
- Media queries for desktop and mobile responsiveness, with a minimum of 375px and a maximum of 1440px.

Order summary component project   02/2022 – 02/2022

- Built as a milestone project while using front-end Mentor.
- Technologies: HTML5, CSS3, VSCode, FontAwesome, Google Fonts, Github and Gitpod.
- Use of flexbox technology and responsive design.
- View this deployed project on Netlify @ https://gallant-aryabhata-a64ffb.netlify.app/

Password Generator   01/2023 – 01/2023

- Technologies: HTML5, CSS3, JS, VSCode, FontAwesome, Github and Gitpod.
- A visual, and logical password generator that can generate complex, or simple passwords using symbols, numbers, and uppercase based on user option, with a maximum of 50 characters.
- This can be viewed on Netlify @ https://amazing-sundae-8709f5.netlify.app/

PROFESSIONAL EXPERIENCE

Tactical Gaming (TG)   03/2022 – Current
Web Team Member/Debugger

- Tech and languages used: HTML5, CSS3 and PHP. The site itself is powered by Invision community.
- Access to the control panel for generated code, statistics and monthly update packs to be released, on a codebase that spans over 50,000 lines of code.
- Debugging CSS, to keep semantic, clean code. Since my input, a 10% increase in speed, regarding fixes and solutions has been met.
- Part of a 7 person team, delivering a service, and maintaining a community of over 700 users, both on Discord and on the TG site.
